# Transform Your Skin

The signs of aging are most clearly seen in our skin. Fine lines, wrinkles, sagging, irregular skin pigmentation, and dryness are all signs of the effects of the sun, wind, and time. Don't despair; now you can transform your skin!

The NEW NEOGEN treatment is a cutting-edge beauty procedure that employs plasma to improve the skin's structure overall, revealing younger, healthier, and more flawless skin.

## The Proven Way to Target The Signs of Aging

Clinical studies show that NeoGen treatments improve upper eyelid tightening by 22% on average.

### Benefits of NeoGen PSR

- Reduction of fine lines and wrinkles.
- Tightening of the skin.
- Improvement in skin elasticity.
- Better skin texture.
- Reduced pore size.
- Softening of any scar tissue.
- Tightening of the eyelids.

## How Does NeoGen Nitrogen Plasma Work?

NeoGen skin regeneration is a one-of-a-kind treatment that revitalizes your skin with real "plasma" energy. It's the first and only aesthetic treatment proven to deliver true skin regeneration, resulting in remarkable and long-lasting results.

Excited nitrogen gas is the source of the power that drives plasma. Plasma's unique ability to maintain the skin's outer layers during treatment makes it a useful natural dressing while new, healthy skin regenerates below.

*NeoGen is a safe, non-surgical alternative to plastic surgery so there's generally no need for a facelift. FDA approved*
